

VOCs in collections of art on paper

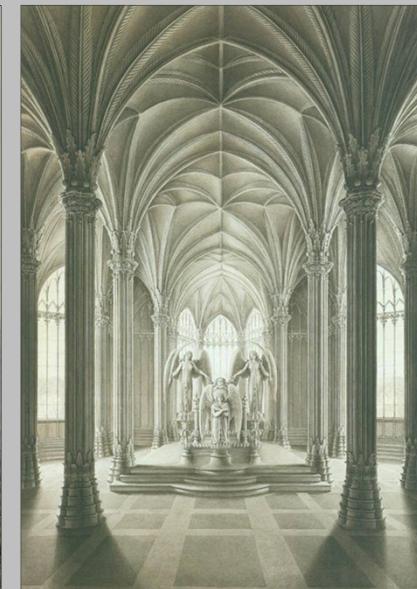

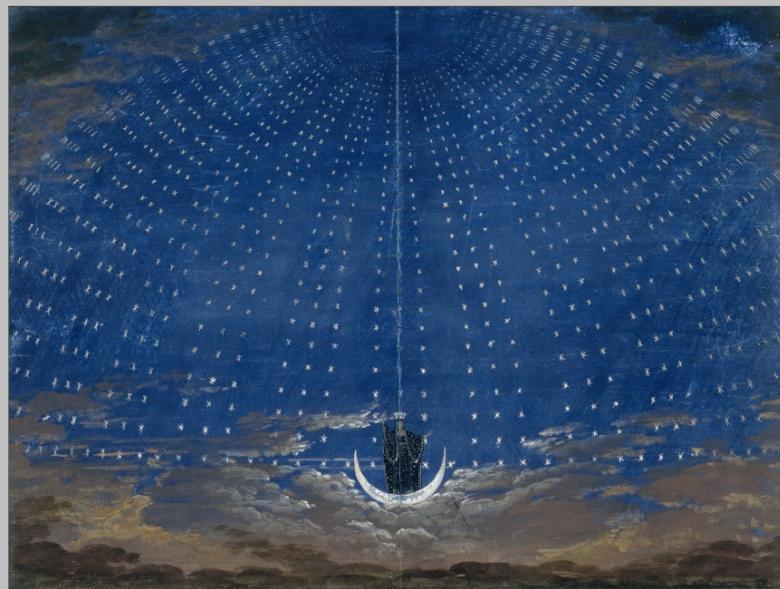

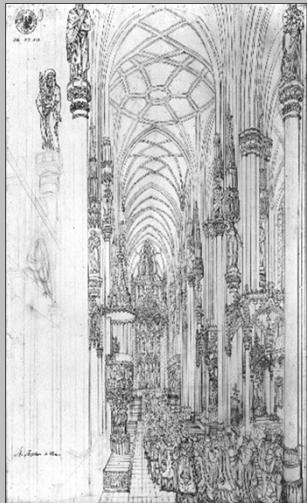

Fabienne Meyer¹, Antje Potthast², Gerhard Volland³

¹ Kupferstichkabinett (Museum of drawings and prints), National Museums of Berlin

² University of Natural Resources and Life Sciences, Department of Chemistry, Division of Chemistry of Renewables, Biopolymer analytics

³ Material Testing Institute of the University Stuttgart, Otto-Graf-Institut (MPA/OGI)

Collection Karl Friedrich Schinkel (1789 - 1841)

Storage situation

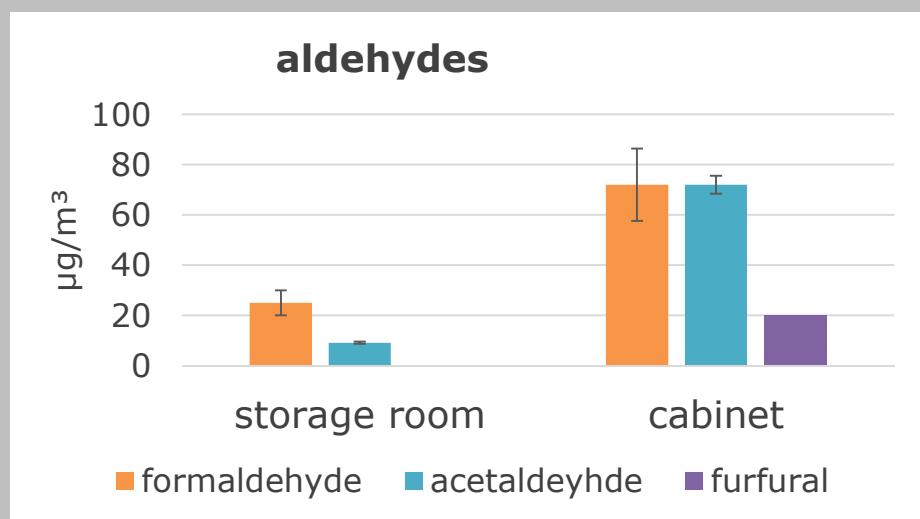

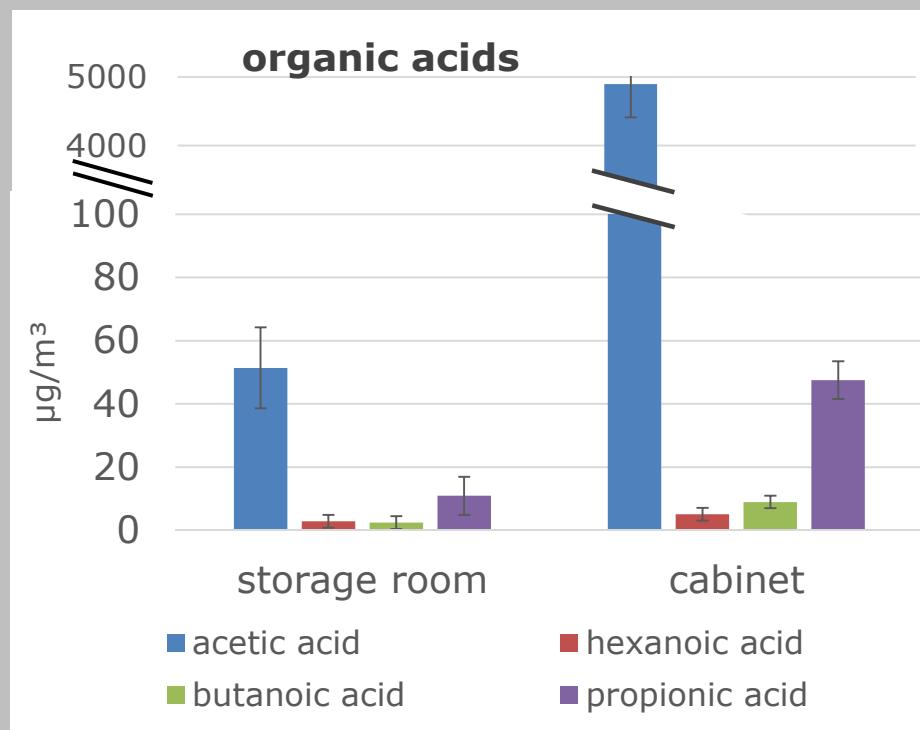

works, mounted on paperboard

portfolios

1. Air composition

2. Emission sources (Static Headspace – GC/MS)

2. Emission sources - acetic acid

material

cabinet walls
(chipboard, melamine)

date

ca. 1990

shelves (beech wood)

ca. 1990

leather (historic portfolio)

ca. 1845

cardboard (hist. portfolio)

ca. 1845

fabric, dark (hist. portfolio)

ca. 1845

fabric, light (hist. portfolio)

ca. 1845

2. Emission sources - acetic acid

material

cabinet walls
(chipboard, melamine)

date

ca. 1990

shelves (beech wood)

ca. 1990

leather (historic portfolio)

ca. 1845

cardboard (hist. portfolio)

ca. 1845

fabric, dark (hist. portfolio)

ca. 1845

fabric, light (hist. portfolio)

ca. 1845

historic paperboard mount

ca. 1845

2. Emission sources - acetic acid

material

cabinet walls
(chipboard, melamine)

date

ca. 1990

shelves (beech wood)

ca. 1990

leather (historic portfolio)

ca. 1845

cardboard (hist. portfolio)

ca. 1845

fabric, dark (hist. portfolio)

ca. 1845

fabric, light (hist. portfolio)

ca. 1845

historic paperboard mount

ca. 1845

archival cardboard
(3% CaCO_3)

ca. 2010

2. Emission sources - acetic acid

material

cabinet walls
(chipboard, melamine)

shelves (beech wood)

leather (historic portfolio)

cardboard (hist. portfolio)

fabric, dark (hist. portfolio)

fabric, light (hist. portfolio)

historic paperboard mount

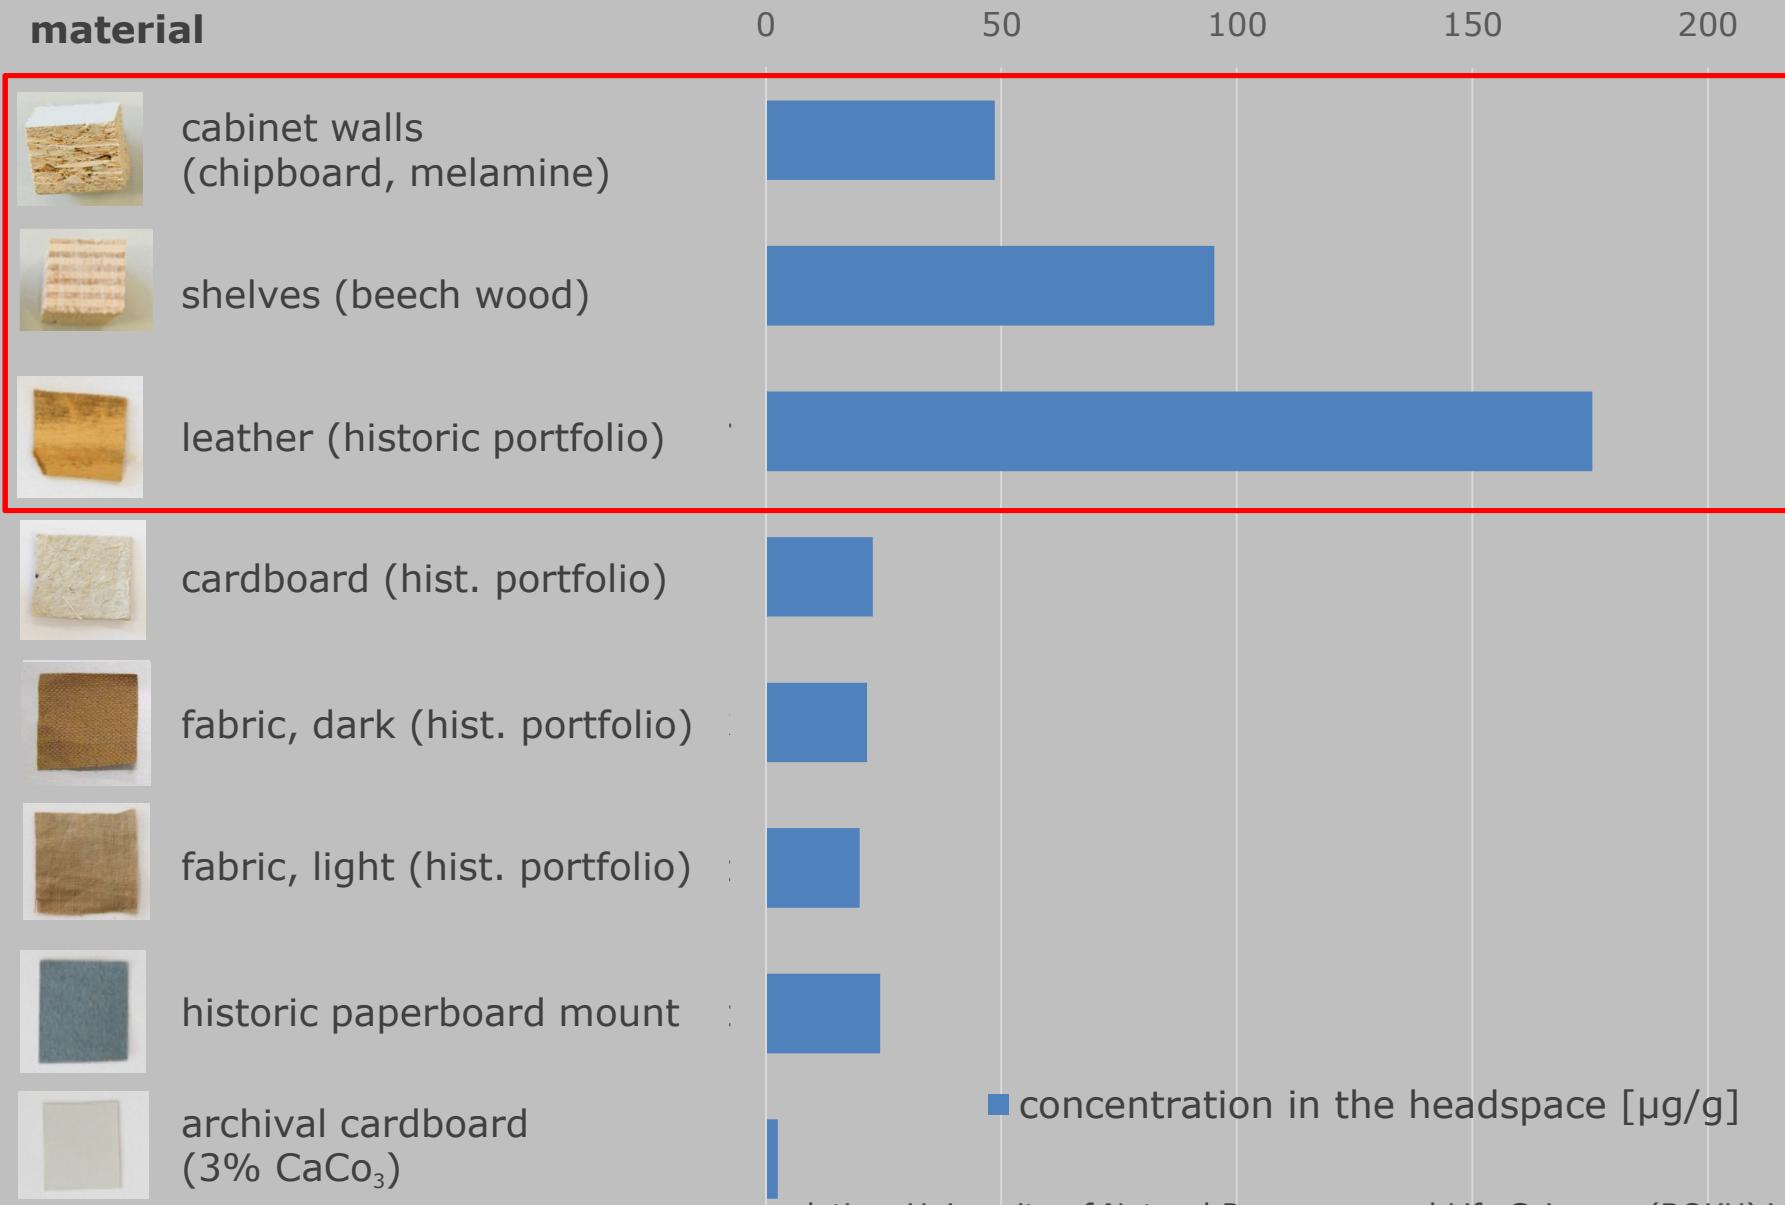

archival cardboard
(3% CaCO_3)

0 50 100 150 200

■ concentration in the headspace [$\mu\text{g/g}$]

analytics: University of Natural Resources and Life Sciences (BOKU) Vienna

2. Emission sources - acetic acid

2. Emission sources - acetic acid

■ concentration in the headspace [$\mu\text{g/g}$]

2. Emission sources - formic acid

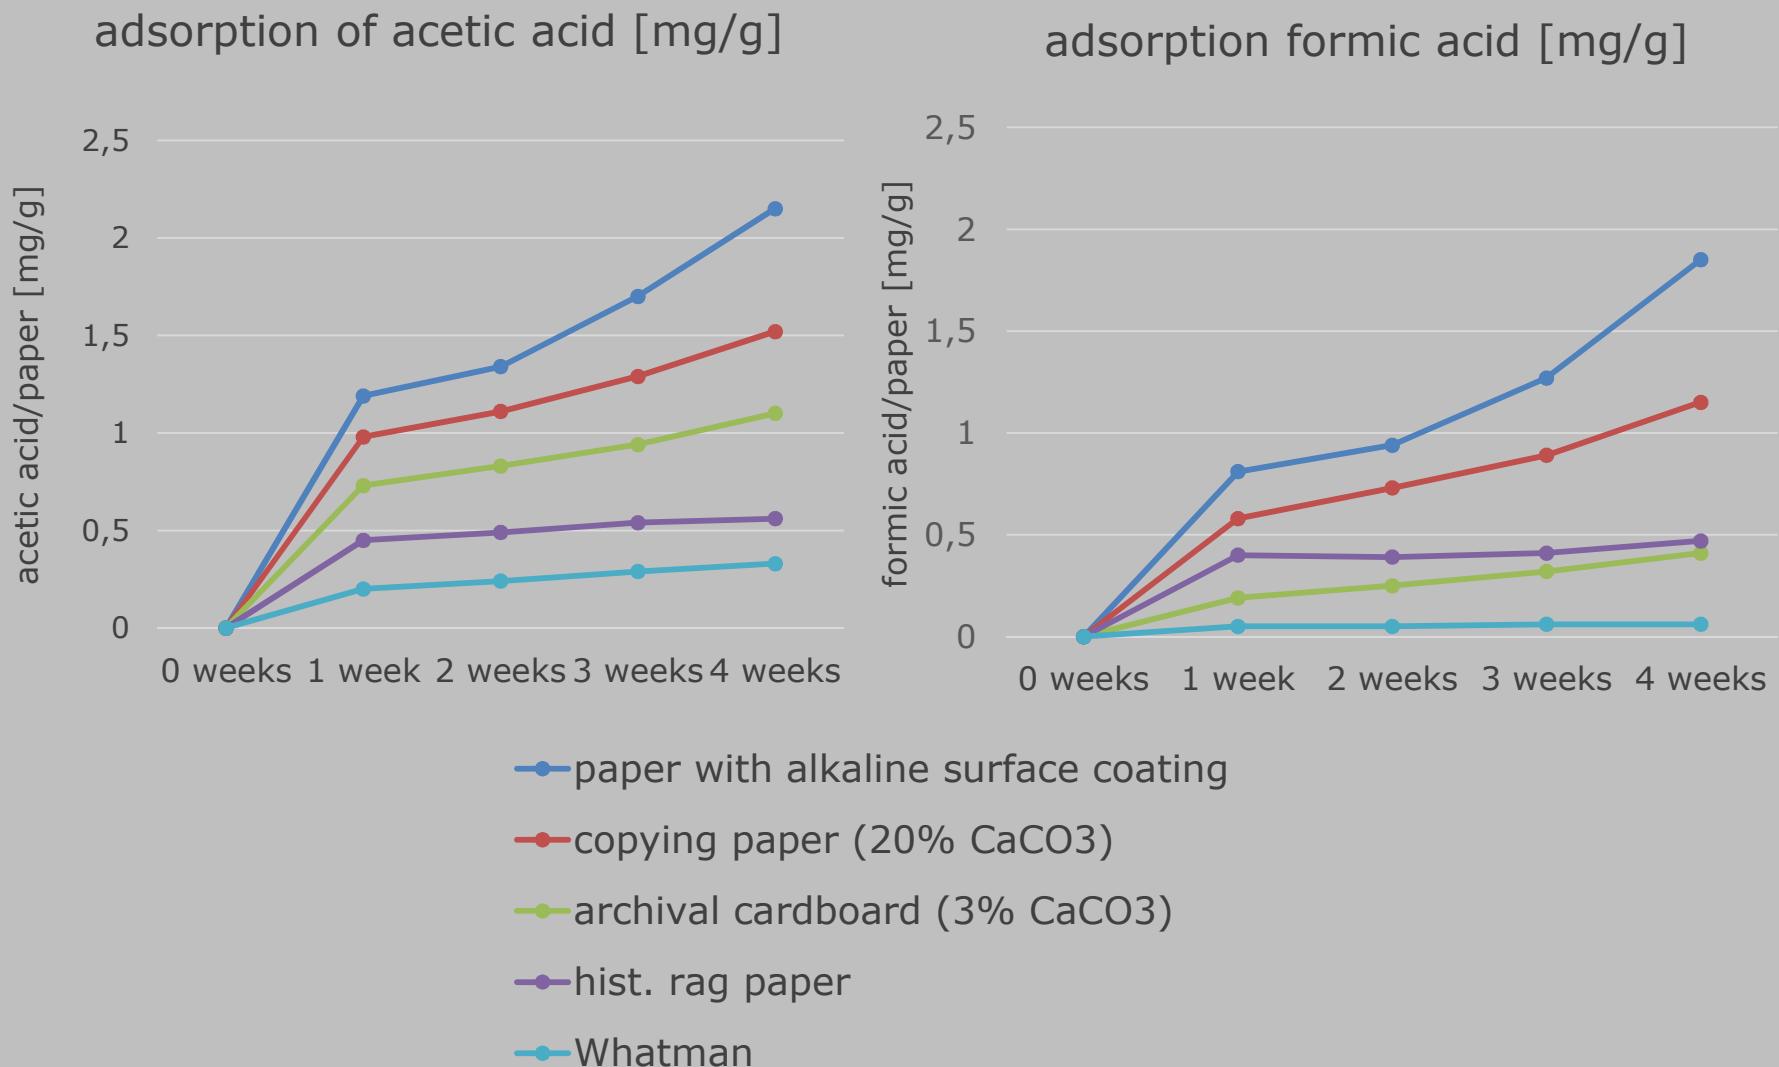

3. Interaction Paper - VOCs

3. Interaction Paper - VOCs

paper	alkaline reserve
Whatman no.1 filter paper	none
historic rag paper (gelatin sizing)	unknown
archival cardboard	ca. 3%
copying paper (lignin free)	ca. 20%
coated paper (lignin free)	alkaline surface coating

3. Interaction Paper - VOCs

3. Interaction Paper - VOCs

	proportion acetic acid: formic acid*
Whatman No 1 Filter Paper	1,0 : 0,2
historic rag paper	1,0 : 0,8
copying paper (20% CaCo ₃)	1,0 : 0,8
paper with alkaline coating	1,0 : 0,9
archival cardboard (3% CaCo ₃)	1,0 : 0,4

*adsorption after 4 weeks exposure

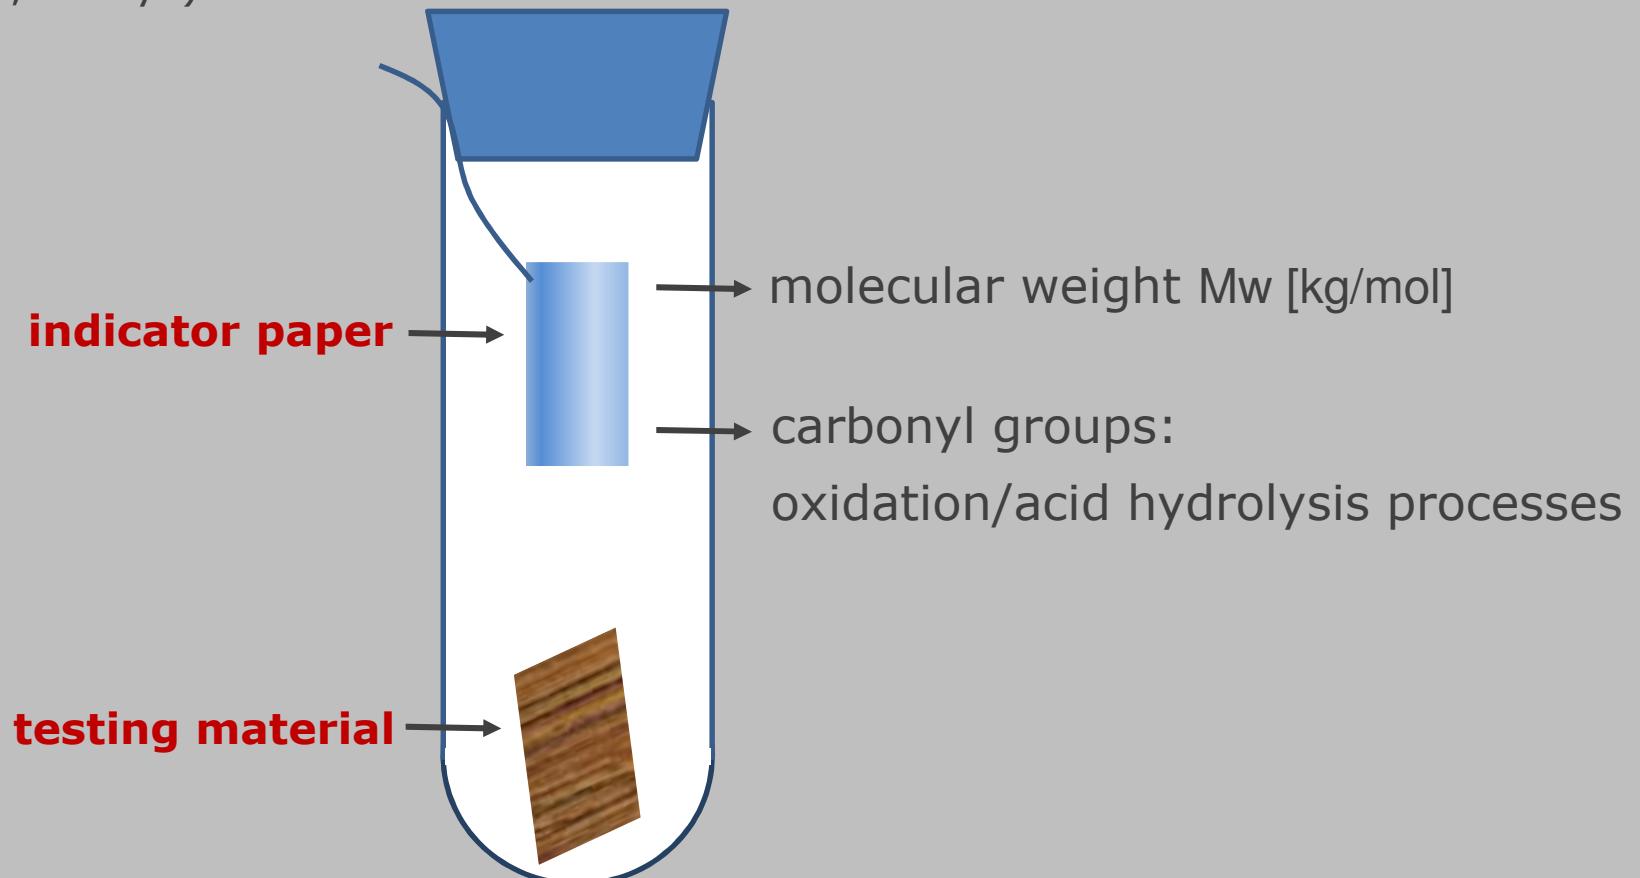

Adsorption
=

Degradation
?

4. Effect of VOCs on paper

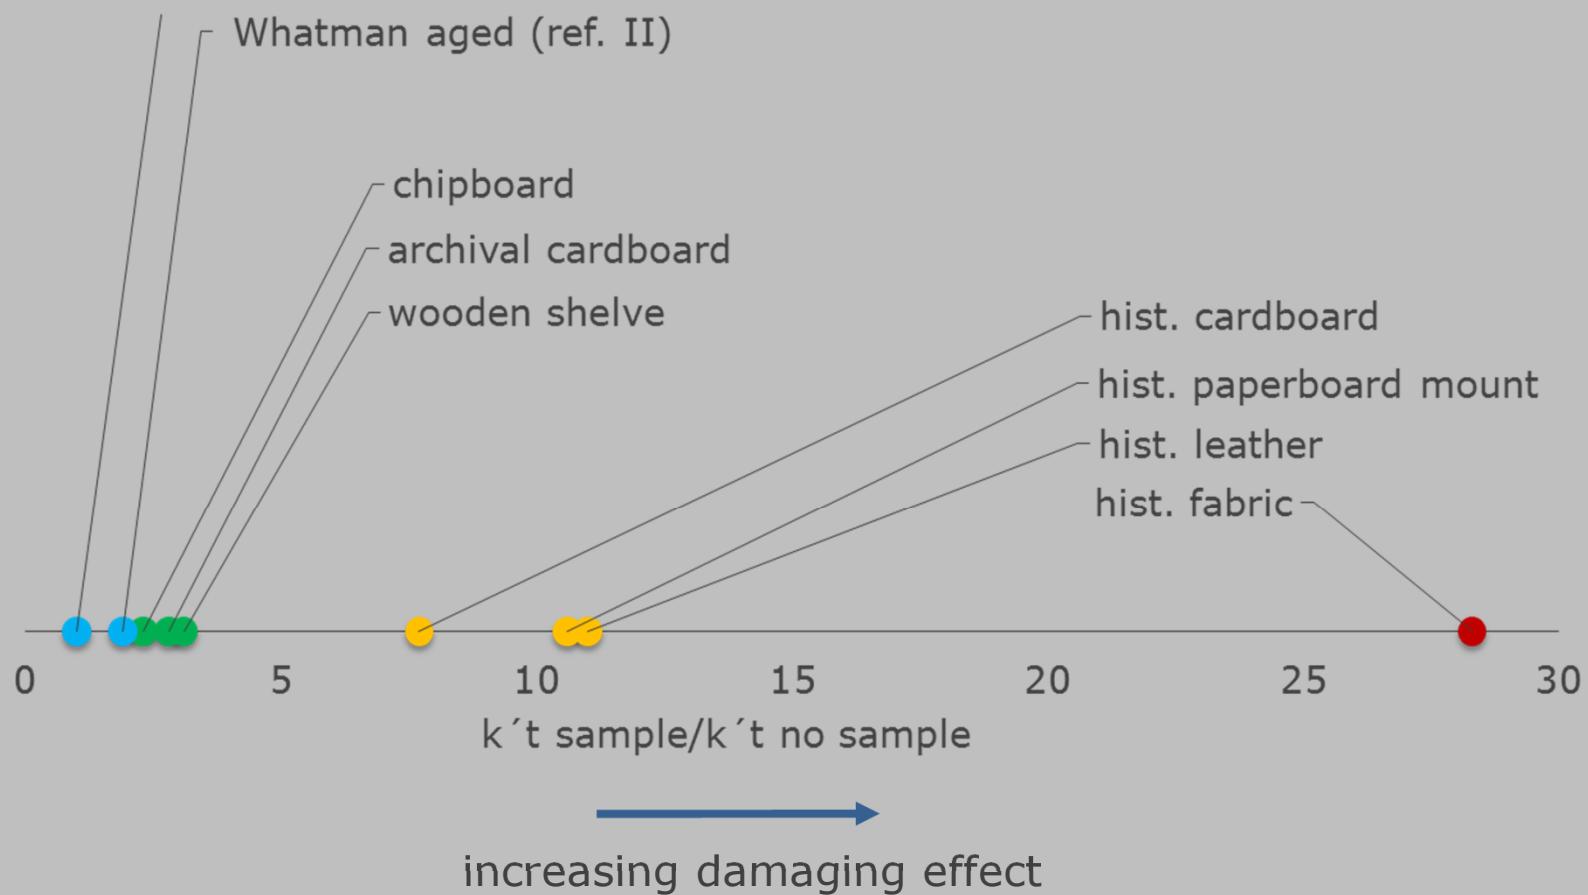

Strlič et al. test*:

(100°C, 6 days)

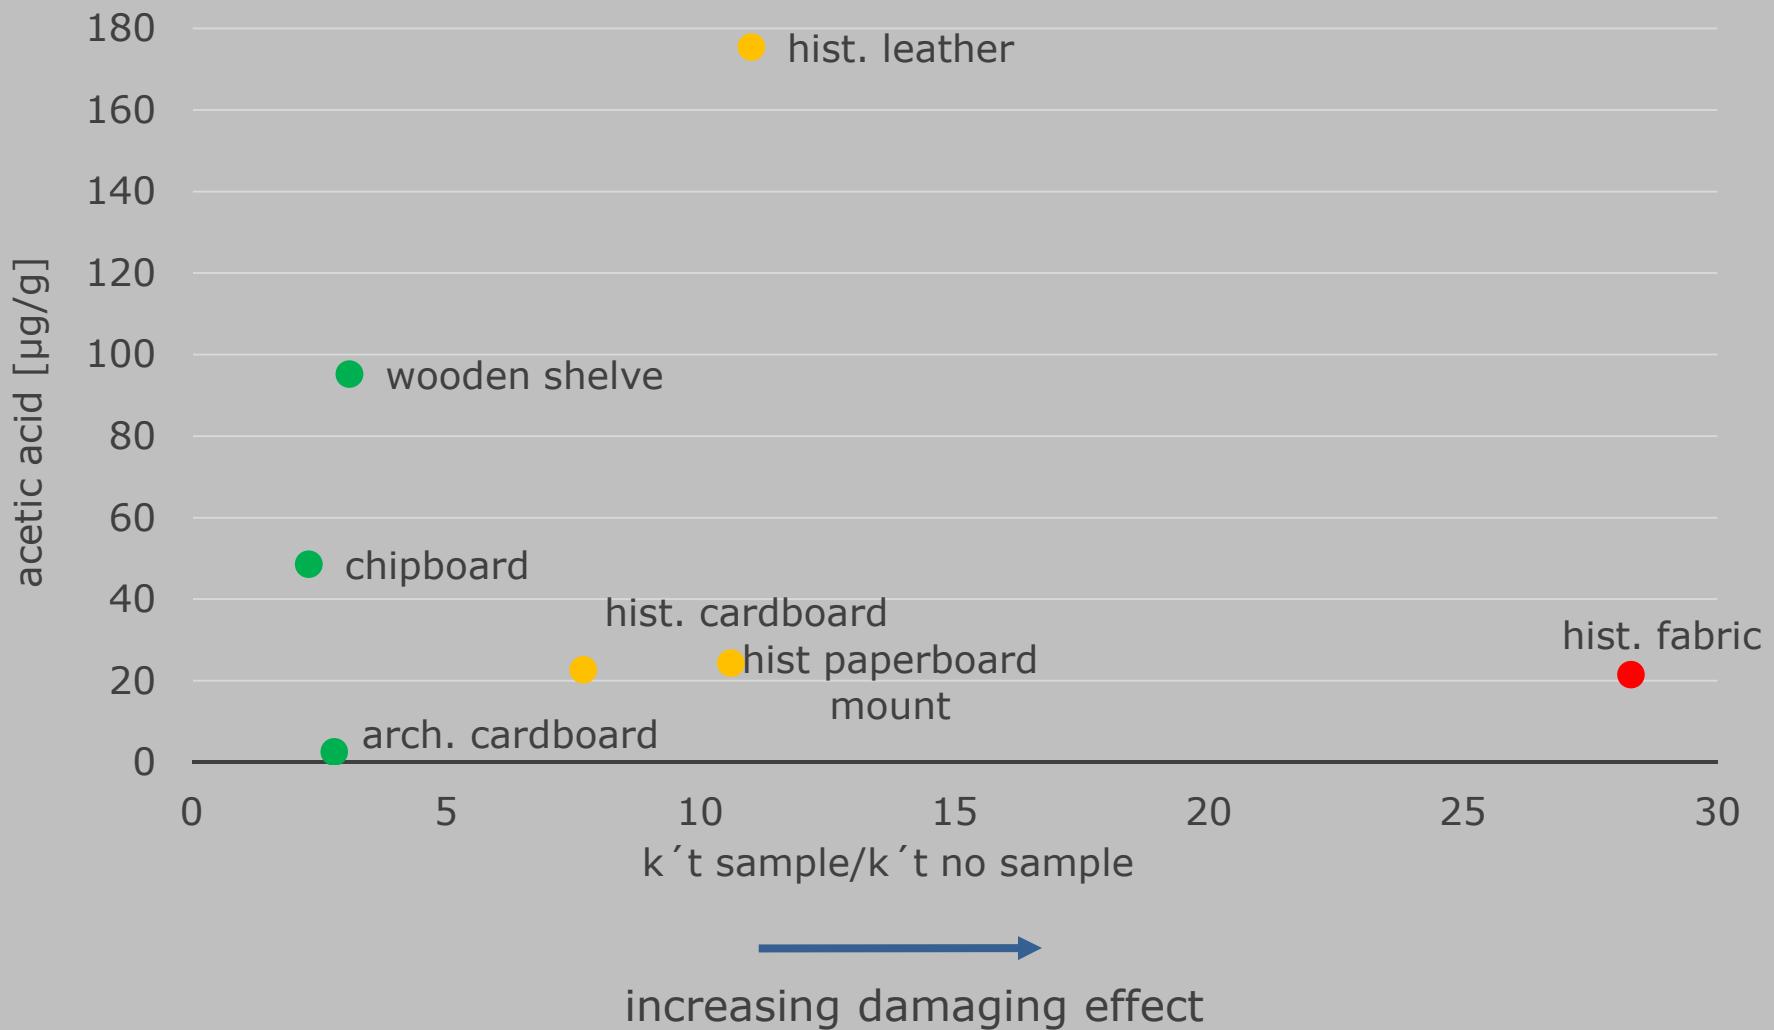

4. Effect of VOCs on paper (Whatman no.1)

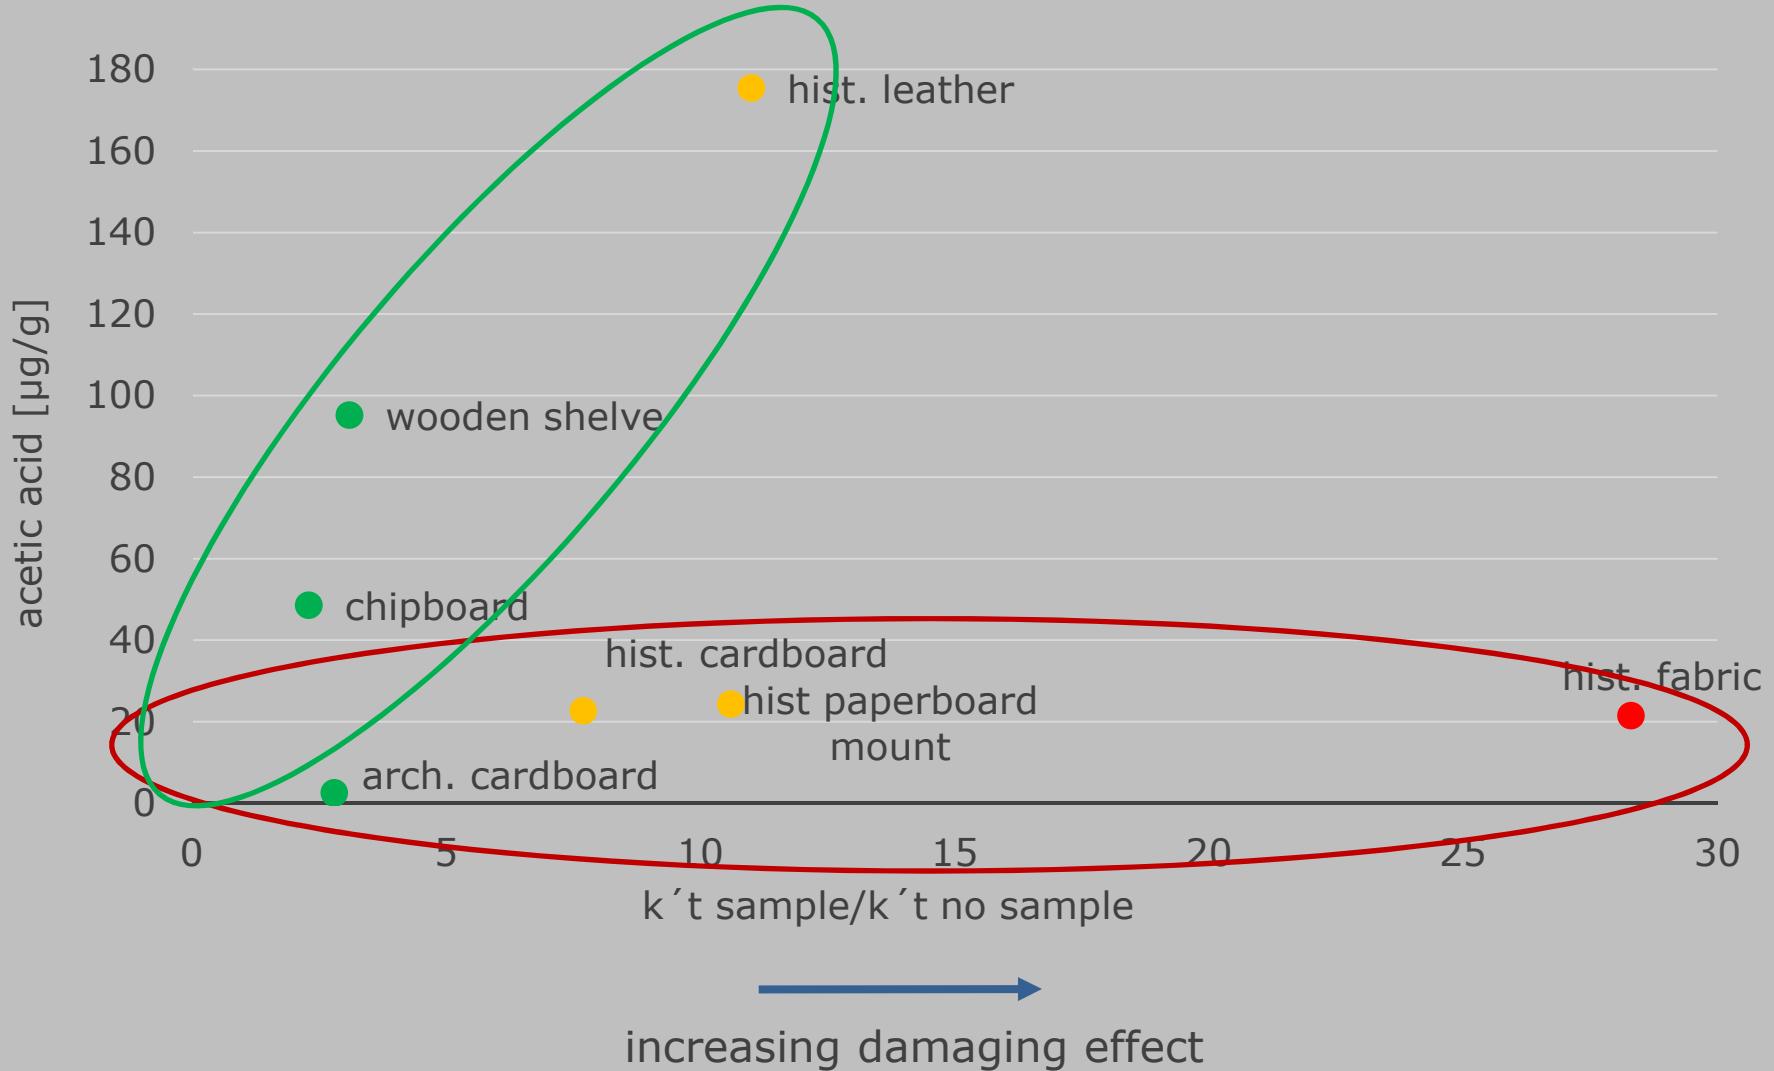

Whatman unaged (ref. I)

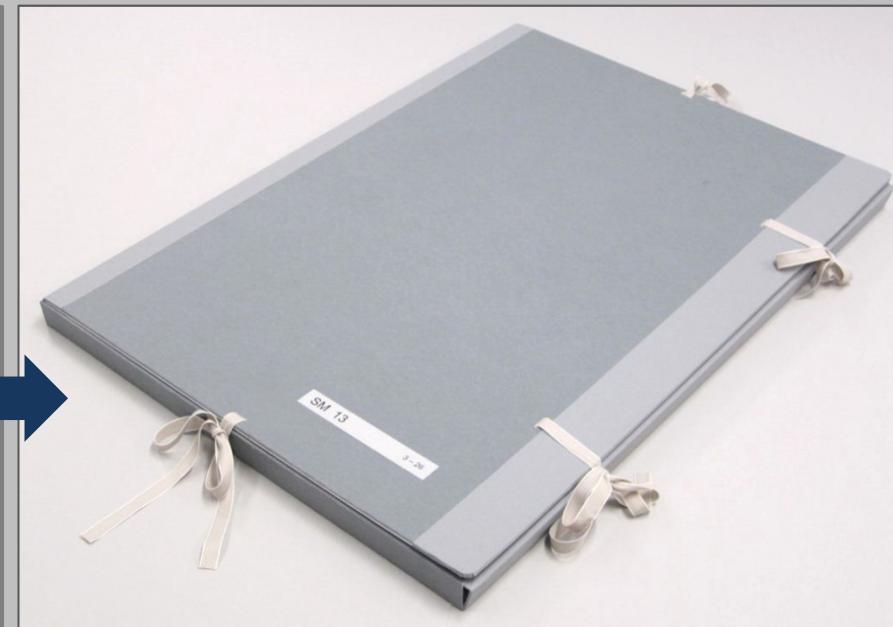

4. Effect of VOCs on paper (Whatman no.1)

4. Effect of VOCs on paper (Whatman no.1)

5. Measures: exchange of portfolios

5. Measures: exchange of wooden shelves

wooden shelves

powder coated metal shelves

5. Measures: increasing the AER

ventilation slots

5. Measures: sealing the wooden back wall

sealing of the back side

Thank you!
